CleanCut Technologies Honored as a “Best Place to Work in Orange County 2017”

ANAHEIM, Calif. (June 22, 2017) -- CleanCut Technologies, a leader in medical device packaging, is proud to announce the company was recently named as one of the “**2017 Best Places to Work in Orange County**” by the *Orange County Business Journal*.

This county-wide awards program was designed to identify, recognize and honor the best places of employment in Orange County, California, benefiting the county's economy, its workforce and businesses.

“Our employees are the cornerstone of our success”, said Tim Bell, President of CleanCut Technologies. “We are committed to creating a work environment where employees are appreciated and empowered to succeed, which ultimately results in the success of our customers,” he explained.

Organizations from across the county entered the two-part process to determine the *Best Places to Work in Orange County*. The first part consisted of evaluating each employer's workplace policies, practices, and demographics. This part of the process was worth approximately 25% of the total evaluation. The second part consisted of an employee survey to measure the employee experience. This part of the process was worth approximately 75% of the total evaluation. The combined scores determined the top organizations and the final ranking. The ranking of the winning organizations will be released via a special section of the *Orange County Business Journal's* July 24 issue.
